

Cyber 2S1P 950 PCI

Quick Installation Guide

Introducing the *Cyber 2S1P 950 PCI*

The *Cyber 2S1P 950 PCI* high-speed serial I/O card provides two 9-pin serial ports and one parallel port.

Key Features and Benefits

- Universal PCI card design that works in 32-/64-bit 3.3V/5V PCI and PCI-X slots
- Provides 2 RS-232 16950 UART serial ports with built-in 128-byte buffers
- Provides 1 IEEE1284 Compliant SPP/EPP/ECP parallel port

System Requirements

- Pentium or equivalent computer with an available PCI slot
- Windows® 7 (32-/64-bit) / Vista (32-/64-bit) / XP (32-/64-bit) / Server 2003 & 2008 (32-/64-bit) / 2000 / ME / 98SE / 98 / 95

Package Contents

- *Cyber 2S1P 950 PCI board*
- Connector bracket w/9-pin serial port
- Driver CD
- Quick installation guide

Layout

Figure 1: Board Layout

Jumper Settings (JP1, JP2)

Open = 0 volts (default)

Short 1-2 = 5V

Short 2-3 = 12V

Note: Most serial devices do not require additional power through the serial port. Refer to your serial device's manual for more information.

Power Connector

Connects to the system's power supply. Make this connection when the serial port(s) are configured for 5V or 12V power.

Hardware Installation

General instructions for installing the card are provided below. Since the design of computer cases and motherboards vary, refer to your computer's reference manual for further information, if needed.

Static Electricity Discharge may permanently damage your system. Discharge any static electricity build up in your body by touching your computer's case for a few seconds. Avoid any contact with internal parts and handle cards only by their external edges.

1. Turn OFF the power to your computer and any other connected peripheral devices.

2. Unplug the power cord from the computer.
3. Remove the computer cover.
4. Remove the slot bracket from an available PCI slot.
5. To install the card, carefully align the card's bus connector with the selected PCI slot on the motherboard. Push the board down firmly, but gently, until it is well seated.
6. Replace the slot bracket holding screw to secure the card.
7. Replace the computer cover and reconnect the power cord.

Driver Installation

Please make sure the board is installed before proceeding with driver installation.

Windows 7 (32-/64-bit)

1. Install the board and boot up Windows.
2. Right click **Computer**, click **Manage**, click **Device Manager**.
3. Insert the driver CD. Right click **PCI Serial Port**, click **Update Driver Software**.

4. Click **Browse my computer for driver software**.
5. Type **D:**, then click **Next**. (Change **D:** to match your CD/DVD-ROM drive letter)
6. Click **Install this driver software anyway**.
7. At **Windows has successfully updated your driver software**, click **Close**.
8. Right click **PCI Device**, click **Update Driver Software**.
9. Repeat steps 4-7.
10. Right click **CyberSerial Communication Port**, click **Update Driver Software**.
11. Repeat steps 4-7.
12. Right click **CyberSerial Communication Port**, click **Update Driver Software**.
13. Repeat steps 4-7 to complete the installation.

Windows Vista (32-/64-bit)

1. Install the board and boot up Windows.
2. At the **Found New Hardware** window, insert the driver CD, click **Locate and install driver software (recommended)**, then click **Continue**.

3. Click **Don't search online**.
4. Click **I don't have the driver disc. Show me other options**.
5. Click **Browse my computer for driver software (advanced)**.
6. Type **D:**, click **Next**. (Change **D:** to match your CD/DVD-ROM drive letter)
7. Click **Install this driver software anyway**.
8. At **The software for this device has been successfully installed**, click **Close**.
9. Repeat steps 3-8 to complete the installation.

Windows XP (32-/64-bit) / Server 2003 (32-/64-bit)

1. Install the board and boot up Windows.
2. At the **Found New Hardware Wizard**, insert the driver CD.
3. Select **No, not this time**, click **Next**. Skip this step and go directly to step 4 if not prompted.
4. Select **Install the software automatically (Recommended)**, then click **Next**.

5. Click **Continue Anyway**, then click **Finish**.
6. Repeat steps 3-5 three times to complete the installation.

Windows Server 2008 (32-/64-bit)

1. Install the board and boot up Windows.
2. At the **Found New Hardware Wizard**, click **Locate and install driver software (recommended)**.
3. Insert the driver CD.
4. Click **Don't search online**. Skip this step and go directly to step 5 if not prompted.
5. Click **I don't have the disc. Show me other options**.
6. Click **Browse my computer for driver software (advanced)**.
7. Type **D:**, then click **Next**. (Change **D:** to match your CD/DVD-ROM drive letter)
8. Click **Install this driver software anyway**.
9. At **The software for this device has been successfully installed**, click **Close**.
10. Repeat steps 4-9 to complete the installation.

Windows 2000

1. At the **Found New Hardware Wizard**, click **Next**.
2. Select **Search for a suitable driver for my device (recommended)**, and click **Next**.
3. Select **Specify a location**, uncheck the other boxes, and click **Next**.
4. Insert the driver CD, type in **D:**, then click **OK**. (Change **D:** to match your CD-ROM drive letter)
5. Click **Next** and **Finish**.
6. Repeat steps 1-5.
7. Restart Windows to complete the installation.

To Verify Windows 7 / Vista / XP / Server 2003 & 2008 / 2000 Installation

1. Check in Device Manager to verify installation.

For Windows 7: Right click **Computer**, click **Manage**, then click **Device Manager**.

For Windows Vista: Right click **Computer**, click **Manage**, click **Continue**, then click **Device Manager**.

For XP / Server 2003 / 2000: Right click **My Computer**, click **Manage**, then click **Device Manager**.

For Server 2008: Right click **Computer**, click **Manage**, double click **Diagnostics**, click **Device Manager**.

2. Click on the + (plus sign) in front of **Ports (COM & LPT)**, **CyberSerial 950 16Cxxx...** and **SIIG CyberPro Parallel Port...** should be displayed.
3. Double click **Multifunction adapters**, **SIIG CyberPro 2S1P board** should be displayed.

Windows ME

1. At the **Add New Hardware Wizard**, choose **Specify the location of the driver (Advanced)**, click **Next**.
2. Check **Specify a location**, uncheck the other box, insert the driver CD, type in **D:\9x**, then click **Next**. (Change **D:** to match your CD-ROM drive letter)

3. Click **Next** and **Finish**.
4. Repeat steps 1-3.
5. Restart Windows to complete the installation.

Windows 98SE / 98

1. At the **Add New Hardware Wizard**, click **Next**.
2. Select **Search for the best driver for your device (Recommended)**, then click **Next**.
3. Select **Specify a location**, uncheck the other boxes, insert the driver CD, type in **D:\9x**, then click **Next**. (Change **D:** to match your CD-ROM drive letter)
4. Click **Next**, then **Finish**.
5. Repeat steps 1-4.
6. Restart Windows to complete the installation.

Windows 95

1. At the **Update Device Driver Wizard**, click **Next**.

2. Insert the driver CD, and click **Other Locations**. Type in **D:\9x**, click **OK**, then **Finish**. (Change **D:** to match your CD-ROM drive letter)
3. From the **Insert Disk** window, click **OK**. When the **Copying Files** dialog box appears, type in **D:\9x**, then click **OK**. (Change **D:** to match your CD-ROM drive letter)
4. Repeat steps 1-3.
5. Restart to complete the installation.

To Verify Windows ME / 98SE / 98 / 95 Installation

1. From the main desktop, right click **My Computer**, click **Properties**, then click **Device Manager**.
2. Double click **Ports (COM & LPT)**, **CyberSerial 950 16Cxxx...**, **Printer Port...**, and **CyberParallel** should be displayed.
3. Double click **Multi-function adapters**, **SIIG CyberPro 2S1P PCI board** should be displayed.

Changing COM Port Address

Some serial devices need a specific COM port in order to work. If your serial device works properly, do not change this setting.

Windows 7 / Vista / XP / Server 2003 & 2008 / 2000

1. From the **Device Manager** window double click **Ports (COM & LPT)**, then double click **CyberSerial...** port.
2. Click **Settings** tab and click **Advanced**.
3. Click the down arrow next to the **COM Port number** box, select a COM port that is not in use. Click **OK**.
4. Click **OK**, then close **Device Manager** to save the changes.

Windows ME / 98SE / 98 / 95

1. From the **Device Manager** window double click **Ports (COM & LPT)**, then double click the **CyberSerial PCI** serial port you want to change.

2. Click **Settings** tab, click the down arrow next to **Port Name**, select a COM address not currently in use.
3. Click **OK**, then close **Device Manager** to save the changes.

Changing Parallel Port Address (LPT)

Some parallel devices need a specific parallel port in order to work. If your parallel device works properly, do not change this setting.

Windows 7 / Vista / XP / Server 2003 & 2008 / 2000

1. From the **Device Manager** window double click **Ports (COM & LPT)**, then double click **SIIG CyberPro Parallel Port...**
2. Click **Port Settings** tab.
3. At the **LPT Port Number** box, click the down arrow and select an LPT port that is not in use.
4. Click **OK**, then close **Device Manager** to save the changes.

Windows ME / 98SE / 98 / 95

1. From the **Device Manager** window double click **Ports (COM & LPT)**, then double click **CyberParallel**.
2. Click **Settings** tab, check **Enable use of I/O location 278h**.
3. Click **OK**, click **OK** again to close **Device Manager**, and click **Yes** to restart Windows to save the changes.

Technical Support and Warranty

QUESTIONS? SIIG's **Online Support** has answers! Simply visit our web site at www.siig.com and click **Support**. Our online support database is updated daily with new drivers and solutions. Answers to your questions could be just a few clicks away. You can also submit questions online and a technical support analysts will promptly respond.

SIIG offers a lifetime manufacturer warranty with this product. This warranty covers the original purchaser and guarantees the product to be free of any defects in materials or workmanship for the life of the product.

SIIG will, at our discretion, repair or replace (with an identical product or product having similar features and functionality) the product if defective in materials or workmanship. This warranty gives you specific legal rights, and you may also have other rights which vary from state to state. Please see our web site for more warranty details.

If you encounter any problems with this product, please follow the procedures below.

A) If it is within the store's return policy period, please return the product to the store where you purchased from.

B) If your purchase has passed the store's return policy period, please follow the steps below to have the product repaired or replaced.

Step 1: Submit your RMA request.

Go to www.siig.com, click **Support**, then **RMA** to submit a request to [SIIG RMA](#) or fax a request to 510-657-5962. Your RMA request will be processed, if the product is determined to be defective, an RMA number will be issued.

Step 2: After obtaining an RMA number, ship the product.

- Properly pack the product for shipping. All accessories that came with the original package must be included.
- Clearly write your RMA number on the top of the returned package. SIIG will refuse to accept any shipping package, and will not be responsible for a product returned without an RMA number posted on the outside of the shipping carton.
- You are responsible for the cost of shipping to SIIG. Ship the product to the following address:

SIIG, Inc.
6078 Stewart Avenue
Fremont, CA 94538-3152, USA
RMA #: _____

- SIIG will ship the repaired or replaced product via Ground in the U.S. and International Economy outside of the U.S. at no cost to the customer.

About SIIG, Inc.

Founded in 1985, SIIG, Inc. is a leading manufacturer of IT connectivity solutions (including Serial ATA and Ultra ATA Controllers, FireWire, USB, and legacy I/O adapters) that bridge the connection between Desktop/ Notebook systems and external peripherals. SIIG continues to grow by adding A/V and Digital Signage connectivity solutions to our extensive portfolio. SIIG products offer comprehensive user manuals, many user-friendly features, and are backed by an extensive manufacturer warranty. High quality control standards are evident by the overall ease of installation and compatibility of our products, as well as one of the lowest defective return rates in the industry. SIIG products can be found in computer retail stores, mail order catalogs, through major distributors, system integrators, and VARs in the Americas and the UK, and through e-commerce sites.
